Conflict Metals Statement

Many of our customers have recently announced that they have applied for or have become full members of EICC (Electronics Industry Citizenship Coalition). In response to EICC requirements for comprehensive documentation on smelter, source mine and country of origin name and location, the following statement applies:

Please be advised that the finished drawn tin coated copper wire Western Cable supplies are procured ultimately through International Wire Group (a U.S. Corporation). International Wire Group's products are mined and refined in Peru, Malaysia and Indonesia. These regions are not considered conflict areas.

Regards,

Jim Morrison
Quality Manager
Western Cable Corporation
